

Backend Java Developer | Spring Boot & Microservices

I am a computer systems engineer specialized in microservices with java and with practical experience in the development of web and mobile applications. Also, I consider myself good at building backend solutions using tools like Spring Boot, improving scalability and security of system. I like to write clean and maintainable code to improve system performance and continuously learn new technologies for my growth as a software developer.

Skills

- **Programming languages:** Java, Kotlin, Python, JavaScript, TypeScript, PHP.
- **Database:** MySQL, MongoDB, PostgreSQL.
- **Frameworks:** Spring Boot, Hibernate, Angular, React.
- **Technologies & tools:** Git, GitHub, Postman, Docker, Maven, Gradle, MVC & MVVC architecture, Kafka.
- **Methodologies:** Scrum (Certified), Agile Development

Experience

Migration of PHP API to Java (Spring Boot)

- **Period:** December 2024 – April 2025
- Migrated a PHP-based API to Java 21 using Spring Boot, Spring Security, Hibernate, and MySQL.
- Integrated CI/CD with GitHub Actions and containerized the app using Docker.
- Improved system scalability and organization via Docker networking.
- [GitHub](#)

Mobile App for Avocado Dry Matter Traceability (Internship)

- **Role:** Mobile development leader.
- **Period:** August 2024 – December 2024.
- **Technologies:** Kotlin, XML, API REST, Bluetooth, push notifications, QR scanner, Coroutines, ticket printing, Room database and Retrofit for API handling.
- **Description:** Follow the traceability of the avocado, thus maintaining total control both in the field and in the laboratory.
- **Impact:** Reduced manual labor by 30% through process automation.

Mobile App for events of company (Freelance)

- **Role:** Mobile development
- **Period:** June 2024 – August 2024
- **Technologies:** Kotlin, Xml, API REST, notifications, Coroutines, Room database and Retrofit for API handling
- **Description:** Develop an application for registering for a company event, allowing users to register for the event and view the activities, as well as being notified of the activities they mark as attending.
- **Impact:** Provide information to the user about an event and remind them of activities, increasing attendance by 20%

Education

Computer Systems Engineering

Technological Institute of Ciudad Guzmán

Status: Graduated 2020 - 2025

Graduate with a focus on developing optimized and scalable backend solutions.

Languages and soft skills

Languages: Spanish (native), English (B1 - improving through daily practice)

Soft skills: Problem solving, teamwork, continuous learning, critical thinking, effective communication, adaptability and self-learning.
